Selectmen of Skowhegan.

Road Commissioner's Report.

To the Citizens of Skowhegan:

As Road Commissioner I submit the following itemized account for your consideration:

The westerly corner of the south bridge, also one center section of same, I found very rotten where the wood-work came in connection with the stone abutment and pier. Both places have been thoroughly repaired.

There have been twenty-five bridges and culverts built, rebuilt and repaired.

Olive street has been built as laid out by the selectmen.

Spring street has been greatly improved by widening the culvert approaches, building the walls up and filling in with the earth taken from Madison street.

There were used in Macadamizing Russell street, 240 loads of uncrushed stone and 440 of crushed stone. Two catch-basins were rebuilt.

In Macadamizing Madison street there were used 300 loads of uncrushed stone, also 560 loads of crushed stone. One catch-basin was built on this street.

Fifty cents per two-horse load was paid for stone delivered on the street or at the crusher.

There have been 100 feet of 12-inch sewer pipe and 50 feet of 6-inch sewer pipe laid.

I have laid about 1100 square yards concrete sidewalk and 100 yards of private walks.

I have the excavating and filling done and curbing set for about 100 square yards more.

Eight hundred and fifty dollars were expended in working the road machines.

Common laborers have been paid \$1.50 per day, man and pair of horses \$3.00 per day.

Respectfully submitted,

GEO. H. WEBB, ROAD COMMISSIONER.

CASH RECEIVED.

Report of Health Officer.

To the Town of Skowhegan:

The report of your Health Officer for the year ending, Feb. 20th, 1898, having shown that "Not a single death had occurred in the town during the year, from typhoid fever, diphtheria, scarletina, measles, or any other epidemic disease," doubtless lead some of the tax payers to believe that the Board of Health and Health Officer had had no work to do, and the salary which they had received was a useless waste of money, hence their petition to the Municipal Officers to dispense with the office of a special Health Officer, which was complied with until late in the fall, when several cases of typhoid fever and scarletina occurred, and the Board of Health urged the appointment of a Health Officer for the remainder of the year. In the interest of economy (?) at the commencement of the year just ended, the appointment of a Health Officer was again dispensed with, until after the time had elapsed when his first round of semi-annual inspections should have been made, and infectious diseases again began to make their appearance, when the Board of Health was again obliged to ask for assistance. Several mild cases of scarlet fever occurred early in the fall, which were not reported to the Board of Health until after it occurred in a more malignant form, resulting in the death of two children in one house.

Scarlet fever in a mild form is often unrecognized by parents and no physican being called in, the patient, after three or four days of confinement to the house, again goes at large, a source of danger for the next four weeks to every person with whom he comes in contact, who has not previously had the disease. In this way the disease got such a start that fifty cases were reported,
